

How to Locate a Journal or Book:

To locate a journal or book, use [GML OneSearch](#), on the GML homepage under **Resources**. To limit your search to only those items that are available in the library, choose the "Available via GML" option. You can also check for items in Gorgas Memorial Library's online catalog, **WebVoyage**. On the library's homepage, click the link marked [Search for a GML held publication](#), under **Catalog**. This Online Public Access Catalog (OPAC) also shows which journals, books, and other items are held in the Gorgas Memorial Library. The listings on the OPAC do not include holdings in any library besides WRAIR. An OPAC computer is located next to the reference desk; another is located on the other side of the library toward the special collections.

How Do I Use GML OneSearch?

[GML OneSearch](#) is a new intuitive information discovery platform offered by the library. It offers a way for users to search all resources (i.e., books, articles, and more) all in one place and supports efficient and integrated access to content from a wide variety of database sources, including PubMed and Web of Science[®]. A key feature is seamless access to electronic content for free and licensed article literature.

GML OneSearch may be searched via the Library's homepage - simply enter an author name, keyword or phrase either from the title or from the subject of interest in the search box and click **Search**. Note: To search for a phrase, enclose the words in double quotes, for instance "yellow fever". If using the link above, you may also select the desired scope in the dropdown box (e.g., to look for articles, choose "Articles"; to look for materials available via the Gorgas Memorial Library, choose "Available at GML").

Displayed results may be further refined by Journal Title, Author, Resource Type, Date, etc. by clicking on the results by category on the left hand side of the results screen. Results are labeled to indicate whether the item is available online or in the library's physical collection. When full text is available, just click and retrieve the licensed or free content (Athens login may be required). When the article content is not available in full text, be sure to verify whether it is available in the physical collection of the library. If the material is not available, click on **ILL Options** to select your preferred Interlibrary Loan service. See Library staff for further information about the use of GML OneSearch.

How Do I Access Full Text Journals?

• Electronic Journals List

Electronic journals the Library subscribes to are accessible via GML OneSearch by clicking on the [E-Journals](#) link on the top right of the page. Electronic journals are also linked on the GML homepage via [See all E-Journals](#) under **E-Journals**, listed under **Resources**. The direct link for accessing the electronic journals

is <http://fh3pp8yl3f.search.serialssolutions.com/>. You can also access this link by clicking on the **Ejournals** tab on the GML online catalog at <http://gorgaswr.army.mil/vwebv/searchBasic>. The GML online catalog is also listed on the library's homepage, at the link labeled [Search for a GML held publication](#), under **Catalog**, under **Resources**.

Services:

Searches and Database Instruction

Librarians perform customized database searches using all specified databases (e.g., Web of Science[®], PubMed, Dialog, BRD, DTIC, etc.) to meet individual needs and requirements and protocol development provisions. Please fill out a search request form (available in the library or on the library's homepage, linked at [Search Request Form](#), under **Literature Searches**, under **General Resources**) and/or request a meeting with the Reference Librarian to develop a client-centered search strategy.

The library also offers orientations, classes, and individual instruction in database searching and bibliographic management software.

Interlibrary Loan

If the item you are searching for is not held at the library or is not available electronically, please order it via [Loansome Doc](#), which is linked under **Services**, or fill out and submit the [Article Request Form](#) or [Book Request Form](#), which are linked under **InterLibrary Loan**, under **General Resources**. For more information about Loansome Doc, see [Frequently Asked Questions](#) (FAQ) under **Loansome Doc** via the Library's homepage, under **Services**.

Bibliometric Services

GML staff provides customized research evaluations using the Web of Knowledge[®] suite of tools (Web of Science[®], Journal Citation Reports[®], and Essential Science Indicators[®]). These research evaluations assess publication productivity, journal sources, and citation patterns of scientific research program areas. Staff is also available to conduct strategies to identify target journals for research publication.

ResearcherID

Register at <http://www.researcherid.com/> to participate in this online gateway to researchers and their published works. In ResearcherID, you can establish a unique ResearcherID number and create a personal profile, including information about your institutional affiliations, research interests, and your publications.

Computer Access

Public computers are available for WRAIR/NMRC staff use (CAC access and log-in by library staff).

Acting Library Chief

Gorgas Memorial Library

503 Robert Grant Avenue, Room 1W60

Silver Spring, MD 20910-7500

gorgasill@amedd.army.mil

October 2012

Library Hours:

0730-1630 M-F

Access after hours is available by scanning your ID badge on the keypad to the left of the library entrance.

Staff:

Daniel Santos, Acting Library Chief

Andrew Rogalski, Technical Services Librarian

Eric Bucher, Reference Librarian (contractor)

Alice Jacobs, Special Projects/Bibliometrics Librarian (contractor)

Aletha Holser, Technical Information Specialist

Paula Clark, Library Technician

Library Mission:

The Gorgas Memorial Library's mission is to support WRAIR and NMRC researcher efforts to perform innovative and relevant scientific research and to develop interventions and products that support the DOD mission and workforce, as well as to participate in communicating and marketing WRAIR/NMRC capabilities. A key goal is to provide timely access to biomedical information regardless of original format or location of resources and documents. In addition to reference, document delivery, and instructional support, services provided at the library include: providing bibliometric services and research evaluations using Web of Knowledge® data and tools for the evaluation of research (including analysis of citation data); and using Web of Knowledge® licensed data to create customized publication strategies.

Library Access:

WRAIR and NMRC employees can access the Library anytime using their electronic access key. Blank circulation cards are available if a patron needs to check out materials after-hours. Simply fill out the cards with your name, title of the book, and bar code number (3 WRD 00000 -----, found in the inside back cover of the book).

You can move the book and journal stacks by pressing buttons attached to the stacks. Journals do not circulate, but you may photocopy articles for your own use.

You may check out books if you have a valid WRAIR or NMRC ID Badge and have filled out a [Library Patron Registration Form](#) either [online](#) or at the Front Desk of the Library.

Library Collections:

The collection currently consists of approximately 500 biomedical and subject-related journals (print or online), books, and microforms.

Current journals are on the display shelves located in the Main Reading Area. Previous issues are located in the journal stacks or on microform in a separate room. **Many journals are available through a subscription [online](#).**

Reference materials are located on shelves next to the Smadel Special Collection in the library. Reference materials do not circulate.

The Smadel Special Collection is in display cases in the back of the library, next to the reference collection. Patrons have limited access to the Smadel Special Collection.

Access to the Smadel Special Collection and WRAIR/NMRC Archives can be arranged by contacting *Andrew Rogalski* at x9364. For the archives, contact *Lara Dagaro* at x9554.

The WRAIR Index of Publications is an annual list that compiles published WRAIR and NMRC research. [PDFs](#) of the annual lists are available through the GML homepage, under **General Resources**.

How Do I Use PubMed LinkOut?

PubMed, the National Library of Medicine's medical article search interface, is accessible from any computer via <http://www.ncbi.nlm.nih.gov/pubmed?holding=MDUWRDLIB>. There is also a direct link to PubMed on the library homepage, listed under **Databases**, under **Resources**. To ensure that you have access to full-text articles, use this link. If you sign up for a **My NCBI** account, your preferences will be saved each time you sign in. It is free to sign up and with this account you can save searches, create filters, have alerts sent directly to your RSS reader or email, etc. For more information on optimizing PubMed for searching, see library staff.

How Do I Use Web of Science®?

Web of Science® is accessible from WRAIR/NMRC computers at <http://apps.isiknowledge.com/>. Click the link on the tab labeled **Web of Science**, or click the link for Web of Science under the tab labeled **Select a Database**, to search this science and social science citation index. Search results include conference proceedings and links to full text for selected GML licensed and free content. Links for Web of Science® are on the library's homepage, under **Databases** and under **Services**.

How Do I Access EndNote Web or EndNote?

EndNote Web, a bibliography management feature of the Web of Science® portal, may be accessed from WRAIR/NMRC computers at <http://apps.isiknowledge.com/> by clicking the **My EndNote Web** link near the top of the page. It is also accessible via the Library's homepage: under **Services**, click the link marked **EndNote/EndNote Web**. You can also have EndNote X6 installed on your computer. Call the Enterprise Service Desk (1-800-872-6482) to have this software installed on your computer.

How Do I Use AMEDD Virtual Library?

The AMEDD Virtual Library allows users access to various databases including MD Consult, UpToDate, PsychINFO, and EBM Reviews. Users also have access to various full-text textbooks, including Vaccines by Plotkin, Mandell's Principles & Practice of

Infectious Diseases, and Nelson Textbook of Pediatrics. To access any of these items, go to <https://medlinet.amedd.army.mil/>. A link to AMEDD Virtual Library Selected Databases, marked **Army Medicine Database**, is on the GML homepage, under **Databases**. The full-text textbooks are also available on the GML homepage, by clicking the link marked **E-Books**, under **Databases**.

How Do I Use the MRMCC Library Electronic Access Portal?

The MRMCC LEAP (Library Electronic Access Portal) allows users to search for journals licensed by the libraries in the Medical Research and Material Command. The direct site for MRMCC LEAP is <http://www.tdnet.com/amrmc>. You may search for specific journals or click the link to the right labeled **Search TDNet** to search for journal articles. MRMCC LEAP is also linked as **MRMCC E-Portal** on the GML homepage, under **Databases**. To access many full-text journals in TDNet, Athens authentication is required.

How Do I Use Athens?

Athens is a user authentication system that controls licensed access to full text articles via the MRMCC Library Electronic Access Portal. Once signed into Athens, you will be able to retrieve full-text articles. To register for an Athens account, go to <https://register.athensams.net/uam/>. Athens registration is also linked under on the GML homepage, under General Resources. Once you have an account, access MyAthens at https://auth.athensams.net/?ath_returl=%2Fmy%2F&ath_dspid=ATHENS.MY. You may also log onto MyAthens on the GML homepage, under General Resources. We recommend you routinely login to Athens prior to database searching. Your login information will be remembered during your search session.

How Do I Use GIDEON?

GIDEON, the Global Infectious Disease & Epidemiology Network, is accessible from your computer at <http://web.gideononline.com/loginx.php?user=WRAIR>. It is also accessible through the Library's homepage by clicking the link marked **GIDEON** under **Databases**.

How do I Access SciFinder?

SciFinder is a chemistry structure and patent database. It is available at <https://scifinder.cas.org/>. You may also access SciFinder from the library's homepage, under **Databases**. For access, see library staff to request a username.

How do I get a DTIC account?

WRAIR/NMRC staff can register to access DTIC to search for and access unclassified reports and many full-text e-journal articles on ProQuest. Online registration is available at: <http://www.dtic.mil/dtic/registration/index.html>. You may also contact library staff to have a search on DTIC done for you.
