Walter Reed Army Institute of Research
Walter Reed Army Medical Center
Washington, D.C. 20307

The Walter Reed Army Institute of Research, founded in 1983, as the Army Medical School, is located in northwest Washington, D.C., on the grounds of the Walter Reed Army Medical Center. It is under the command, control, and supervision of the United States Army Medical Research and Development Command and the United States Surgeon General, Department of the Army. The WRAIR mission is:

"To provide general military medicine research capability and conduct research in the areas of communicable disease and immunology, combat surgery, combat psychiatry, drug development, medicine, military hazard of blast overpressure, chemical and nuclear warfare defense, and the biological effects of microwave irradiation; To plan and conduct educational programs for Department of the Army medical personnel as to military medical research; To conduct epidemiological consultative services for the Office of the Surgeon General and other agencies; To develop biological products (vaccines) against medical problems of military importance; To perform diagnostic tests not available at other military institutions; To supervise extramural research contracts and grants; and To command and control technical and logistical support to the six Walter Reed Army Institute of Research Overseas Units."
