About the Walter Reed Army Institute of Research

The Walter Reed Army Institute of Research (WRAIR) consists of nine scientific divisions each representing a scientific discipline, seven support divisions, and six Special Field Activity laboratories. The nine scientific disciplines are biochemistry, immunology, pharmacology, medicine, neuropsychiatry, pathology, preventive medicine, retrovirology [HIV], and surgery. The staff is roughly 50% military and 50% civilian, equally divided between scientific and support personnel. Important organizational components of the WRAIR are the special field activities in Thailand, Korea, Brazil, Kenya, and Germany. Research and support functions at the overseas labs are closely coordinated with efforts at WRAIR in Washington, DC.

The mission of WRAIR is to counter threats from three sources: biologically active substances, high energy and trauma, and stress and performance. The historic emphasis at WRAIR is research against naturally occurring infectious agents encountered in military training or operations. The threat of "biologically active substances" encompasses naturally occurring infectious diseases, toxins, and commonly used chemicals. In addition, there is significant research to counter physical (environmental) threats and psychological disease in training and in combat operations.

WRAIR primarily works at the basic research and development level, but the institute is also intimately involved in product development with the United States Army Medical Material Development Agency (USAMMDA), Ft. Detrick, MD. By chairing and serving on scientific steering committees, WRAIR scientists provide the technical guidance required for rational development of technical base initiatives. In addition, many products are developed and tested at the WRAIR Special Field Activity Laboratories.

WRAIR's efforts are not limited to research: WRAIR (pronounced "rare") was originally founded in 1893 as the US Army Medical School. It continues to be a center of learning through the military preventive medicine residency, a military medical research fellowship program, and short courses in tropical medicine, veterinary medicine and other subjects. Approximately 80 post-doctoral fellowships bring outstanding young scientists to the Institute for up to two years at a time.

The vertical integration which marks WRAIR's structure has been present from the beginning. Just as Major Walter Reed did his outstanding work on Yellow Fever as a member of the first faculty, the Institute today still has the capability of identifying a threat, determining its cause, designing an answer, testing it under actual field conditions, and teaching others to use the results.

Some Major Accomplishments

- 1898: Reed-Vaughn-Shakespeare Typhoid Board established mechanism of transmission.
- 1900: Yellow Fever Board, in Cuba, proved mosquito transmission of Yellow Fever.
- 1910: Maj. C.R. Darnall developed the use of chlorine to purify drinking water.
- 1918: Maj. R.L. Kahn devised what became the standard serologic test for syphilis.
- 1925: Col. Calvin H. Goddard began work which led to the science of comparative ballistics.
- 1933: Atabrine was introduced as a substitute for quinine in combatting malaria.
- 1940-45: Work by Cpt. D.B. Kendrick led to the first system of blood banking, storage and use.
- 1957: Drs. Hilleman and Buescher isolated Asian flu virus strain used to make first vaccine.
- 1962: Drs. Parkman, Artenstein and Buescher isolated the Rubella virus, leading to a vaccine.
- 1979: WRAIR psychologists played a major role in developing the Army's new manning system.
- 1982: WRAIR immunologists began work to develop the world's first promising malaria vaccine.
- 1990: LTC Robert R. Redfield and colleagues demonstrated for the first time that a vaccine could help the immune system fight chronic infection when they tested a genetically engineered vaccine against HIV, the virus that causes AIDS.

LISTING OF ABSTRACTS

Listing of Abstracts

1. Babcock, J.; Sasala, K.; Cross, A.; Deal, C. "Sialidase in *Neisseria gonorrhoeae* Infections." Clin Res. 1992; 40(2): 382A
Note: (A).
Neisseria gonorrhoeae infections/virulence factors.
2. Baca, L.; Kalvakolanu, D.; Sen, G.; Meltzer, M. "Molecular Mechanisms of Viral Restriction in Interferon-Alpha-Treated HIV-Infected Monocytes." J Interferon Res. 1992; 12(Suppl. 1): S89
Note: (A).
HIV/RNA messenger/RNA/DNA.
3. Ballou, W.; Rosa, C.; Holland, C.; Lanar, D. "Prolonged Protection from *Plasmodium falciparum* Sporozoite Challenge by Immunization with FSV-1 a Recombinant Subunit CS Protein Vaccine." Am J Trop Med Hyg. 1992; 47(4 Suppl.): 98
Note: (A).
Plasmodium falciparum/immunologic drug/circumsporozoite protein/genetic engineering.
4. Bauman, R.; Kant, G. "Escapable and Inescapable Shock Disrupt Delayed Alternation in Rats." Soc Neurosci Abstr. 1992; 18(1-2): 351
Note: (A).
sustained stress model/cognitive performance/avoidance.
5. Berman, J.; Ksionski, G.; Chapman, W.; Waits, V. "Activity of Amphocil Amphotericin B Cholesterol Dispersion in Experimental Visceral Leishmaniasis." Am J Trop Med Hyg. 1992; 47(4 Suppl.): 246
Note: (A).
Leishmania donovani/hamster/antiparasitic drug/antiprotozoal drug.
6. Bernton, E.; DeCoster, M.; Dave, J.; Robles, L. "Immunologic Activation of Astrocytes Dissociation of Nitric Oxide Production and NMDA Mediated Neuronocytotoxicity." Soc Neurosci Abstr. 1992; 18(1-2): 646
Note: (A).
rat/brain/interleukin 1/tumor necrosis factor.

7. Bhattacharjee, A.; Opal, S.; Drabick, J.; Collins, H. "Both IgG and IgM Fractions of Sera from Rabbits Immunized with Boiled *Escherichia coli* J5 Bacteria Protect Neutropenic Rats Against Lethal Bacteremia." Clin Res. 1992; 40(2): 382A
Note: (A).
Escherichia coli/immunoglobulin G/immunoglobulin M/antibodies.
8. Birx, D.; Ammann, A.; Berman, P.; Lucas C. "Immunogenicity and Safety of rgp120(lai) in Early Stage HIV Positive Patients." Int Conf AIDS. 1992; 8(1): Tu39
Note: (A).
AIDS vaccines/gene products/protein precursors/vaccines, synthetic.
9. Birx, D.; Johnson, S.; Burke, D.; Redfield, R. "Vaccine Therapy Using RGP 160 in Early HIV Infection." Clin Res. 1992; 40(2): 333A

TWELFTH AMERICAN PEPTIDE SYMPOSIUM

110

WALTER REED ARMY INSTITUTE OF RESEARCH
U.S. PATENTS ISSUED TO WRAIR INVENTORS

Hudson,TH; King,MA, inventors: Division of Experimental Therapeutics; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Potentiation of Immunotoxin Action by Brefeldin A. U.S. Patent 5,112,607. 1992 May 12.

Hsiao,LYY; Musallam,HA, inventors: Division of Experimental Therapeutics; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Bis-Methylene Ether Pyridinium Compound Preparation. U.S. Patent 5,130,438. 1992 July 14.

WALTER REED ARMY INSTITUTE OF RESEARCH
U.S. PATENT APPLICATIONS FILED BY
WRAIR INVENTORS

Martin,SK; Okoye,VC, inventors: USAMRU-Kenya; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Defined Plasma-Free Medium for Cultivation of *Plasmodium falciparum*. Application SN 07/835,832. 1992 Feb 13.

Martin,SK; inventor: USAMRU-Kenya; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Protein-Free Medium for Cell Cultivation. Application SN 07/836,664. 1992 Feb 13.

Sadoff,J; Teng,N; Bhattacharjee,A, inventors: Division of Communicable Diseases and Immunology; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Lipid A Analog/Immunogenic Carrier Conjugates, the Use Thereof as Vaccines and Polyvalent Hyperimmune Gammaglobulins. Application SN 07/851,397. 1992 Mar 16.

Klayman,DL; Ager,AL; Fleckenstein,LA; Lin,AJ, inventors: Division of Experimental Therapeutics; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Transdermal Treatment of Mice Infected with *Plasmodium berghei*. Application SN 07/854,036. 1992 Mar 19.

Alving,CR; Wassef,NM; Cassatt,D; Koenig,S; White,W, inventors: Division of Biochemistry; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Administration of Liposomes Containing Peptides or Proteins Including CTL Epitopes of HIV Proteins. Application SN 07/860,707. 1992 Mar 31.

Reid,RH, inventor: Division of Medicine; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Vaccines Against Diseases Caused by Enteropathogenic Organisms Using Antigens Encapsulated Within Biodegradable-Biocompatible Microspheres. Application SN 07/867,301. 1992 Apr 10.

Nath,J; Salvado,AJ, inventors: Division of Medicine; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Anti-Tubulin Drugs and Method for Treating Malaria Infections. Application SN 07/874,896. 1992 Apr 28.

Drabick,J; Bhattacharjee,AK, inventors: Division of Communicable Diseases and Immunology; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Starch-Polymyxin B and IgG-Polymyxin Conjugates. Application SN 07/875,618. 1992 Apr 28.

Alving,CR; Nicolau,C; Black,CDV; Tosi,PF; Mouneimne,Y, inventors: Division of Biochemistry; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Liposome-Associated Full-Length CD4 as a Vaccine to Prevent or Treat Immunodeficiency Virus Infections. Application SN 07/875,612. 1992 Apr 28.

Reid,TJ; Alving,BM, inventors: Division of Medicine; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. A Quantitative Method for Measuring Thrombin Time for Determining Plasma Levels of Thrombin-Specific Inhibitors. Application SN 07/893,631. 1992 Jun 5.

Iwu,MM; Okunji,CO; Jackson,JE; Tally,JD; Klayman,DL, inventors: Division of Experimental Therapeutics; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Antiparasitic and Antifungal Compositions and Methods of Use. Application SN 07/947,816. 1992 Sep 21.

Grogl,M; Fleckenstein,L; McGreevy,PG; Schuster,BG, inventors: Division of Experimental Therapeutics; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Topical Antileishmanial Compositions and Treatment. Application SN 07/948,533. 1992 Sep 22.

Berman,JD; Smith,JW; Queener,SF; Bartlett,MS; Ellis,WY; Milhous,WK; Chung,H, inventors: Division of Experimental Therapeutics; the United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Treatment and Prophylaxis of Pneumocystis Pneumonia Using 8-Aminoquinolines. Application SN 07/958,856. 1992 Oct 1.

Bernton,E; Gendelman,H; Jett,M, inventors: Divisions of Communicable Diseases and Immunology and Pathology; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Inhibitors of Arachidonic Acid Metabolites for Preventing Neurological Damage. Application SN 07/982,656. 1992 Nov 27.

Alving,CR; Amselem,S; Domb,AJ, inventors: Division of Biochemistry; The United States of America as represented by the Secretary of the Army, Washington, D.C., assignee. Lipospheres as Antigen Delivery Vehicles. Application SN 07/987,980. 1992 Dec 10.
