

Dermatology Briefing for Special Operations Forces

13 September 2010

*Kurt Maggio, MD
COL, MC, USA*

*Assistant Professor of Dermatology, George
Washington, Howard and Uniformed Services
Universities*

*Department of Dermatology, Walter Reed Army
Medical Center and Bethesda Naval Medical Centers*

Dermatologic considerations in a tropical medicine

environment: Case scenarios

- First consider most common disorders seen in United States
- Then consider special diseases associated with particular geographical areas of operation
- Then consider possible routes of exposure, susceptibilities, occupational hazards, animal and plant contact, etc.
